EDUCATION

University of New Brunswick — Bachelor of Computer Science

Jan 2025 – Present

Fredericton, NB | In Good Academic Standing (2025/2026)

- **Relevant Coursework:** Programming I & II (Java), Introduction to Databases, Discrete Structures, Computability & Formal Languages, Numerical Methods, Linear Algebra, Probability & Statistics

TECHNICAL SKILLS

- **Languages:** Java, SQL, HTML, CSS
- **Tools:** Git, GitHub, Eclipse, Cursor, Microsoft Excel
- **Currently learning:** JavaScript, TypeScript, React, Next.js, Tailwind CSS, Java Swing, JUnit 5, Maven

EXPERIENCE

Overnight Associate

Jun 2026 – Present

Kent Building Supplies — Fredericton, NB

- Execute overnight inventory and stocking operations independently, following established procedures and safety standards
- Operate an order picker, wave, and pallet jack to move stock at height, following safety protocols with minimal supervision
- Maintain stock accuracy and shelf organization across the store overnight, preparing the floor for opening

Customer Service Manager

May 2025 – Sep 2026

Walmart — Fredericton, NB

- Led front-end operations by scheduling cashier assignments, breaks, and register coverage to keep service running smoothly
- Resolved escalated customer issues with quick, policy-consistent decisions, and owned cash reconciliation with full accuracy
- Trained and onboarded new cashiers on point-of-sale systems and daily front-end procedures

PROJECTS

Co-op Desk — AI Job Application Agent | TypeScript, Next.js, React, Tailwind CSS | github.com/aradhay1734/Co-op-Application-agent

- Built a web app that searches intern and co-op postings from public job boards, fetches each job description, scores how well it matches a resume, and drafts a cover letter for review
- Keeps an application tracker with CSV export, recording every posting considered along with its score and status
- Applications are never submitted automatically — every drafted letter waits for human approval before anything is sent

Campus Gradebook — Java Desktop Application | Java 21, Swing, Maven, JUnit 5 | github.com/aradhay1734/Java-Basics-

- Built a Java desktop gradebook that tracks a roster of students, graduate students, and instructors, updating averages, letter grades, pass rates, and billing as records change
- Added a bulk import that accepts pasted records with inconsistent formatting and lists any line it cannot read, with the reason, instead of failing the whole import
- Includes automated tests and a command-line mode that prints the same report on machines without a display

VOLUNTEER EXPERIENCE

Volunteer Donation Collector

Dec 2025

The Salvation Army — Fredericton, NB

- Supported a community donation campaign, collecting and sorting donated goods with a volunteer team to meet daily collection goals
